Rush Gold Mobilizes Field Crews and Commences WorldView-3 Satellite Alteration Image Acquisition at Skylight and Legal Tender Properties

VANCOUVER, BC, November 25, 2025 – Rush Gold Corp. ("Rush" or the "Company") (CSE: RGN | FSE: B6H) is pleased to announce the mobilization of geologic field crews and the commencement of WorldView-3 (WV-3) satellite alteration image acquisition at its Legal Tender and Skylight properties. The Legal Tender and Skylight properties are 3 kilometers apart, and both are located approximately 60 kilometers northwest of Tonopah, NV within the Royston Hills Republic Mining District, Nye County.

As detailed in the news release of November 11, 2025, this will provide the Company with an opportunity to begin a deeper investigation of both properties (*Image 1*). The objective of the fieldwork will be to assess existing gold and silver rock and soil geochemical anomalies and verify recently identified satellite anomalies that may indicate the alteration footprint of a low sulphidation gold-silver epithermal system (see Rush's news release dated September 18, 2025).

The Company also confirms it has received notice from its satellite provider Vantor Inc. that new imagery tasking via the WV-3 earth observation satellite over the Legal Tender and Skylight Area Of Interest (AOI) has commenced. Tasking is expected to continue, subject to satellite availability until cloud free imagery is acquired. Enhanced high-resolution alteration intensity maps are expected to be delivered with 2-3 weeks of receipt of the satellite images.

“The Company is excited to commence its first exploration programs at the Legal Tender and Skylight properties. Receipt of the enhanced satellite alteration imagery study is anticipated before year end,” says Anthony Zelen, CEO of Rush Gold. He continues, “Field crews are eager to begin assessing the expansion potential of known zones of gold and silver mineralization and following up on new ASTER satellite anomalies that have not been previously investigated on both properties.”

Qualified Person

The scientific and technical information contained in this news release has been reviewed and approved by Kristopher J. Raffle, P.Geo. (BC), Principal and Consultant of APEX Geoscience Ltd. of Edmonton, AB, who is a director of Rush Gold Corp. and a “Qualified Person” as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects. Mr. Raffle has verified the data, which included a review of the sampling, analytical and test methods underlying the data, information and opinions disclosed herein.

About Rush Gold Corp.

Rush Gold is a Canadian mining exploration company focused on advancing its Skylight gold property, located in the Republic Mining District, Nye County, Nevada, in the USA.

Forward-Looking Statements

The information in this news release includes certain information and statements about management's view of future events, expectations, plans and prospects that constitute forward-looking statements, including statements respecting the Company's plans to investigate its Legal Tender and Skylight properties, including the objective of the fieldwork, the delivery of enhanced high-resolution alteration intensity maps of the AOI, and the assessment of the expansion potential of known zones of gold and silver mineralization. These statements are based upon assumptions that are subject to significant risks and uncertainties. Because of these risks and uncertainties and as a result of a variety of factors, the actual results, expectations, achievements or performance may differ materially from those anticipated and indicated by these forward-looking statements. Any number of factors could cause actual results to differ materially from these forward-looking statements as well as future results. Although the Corporation believes that the expectations reflected in forward-looking statements are reasonable, it can give no assurances that the expectations of any forward-looking statements will prove to be correct. Except as required by law, the Corporation disclaims any intention and assumes no obligation to update or revise any forward-looking statements to reflect actual results, whether as a result of new information, future events, changes in assumptions, changes in factors affecting such forward-looking statements or otherwise.
